

...the fans knowing that
 the club is looking after them at
 the same time?
 programmes are part of the
 game, at every level of semi-pro
 upwards in the British Game, not
 have match programmes was
 strange omission game when I
 came to Gibraltar, but it seemed
 the norm. Personally, it helps me
 get a few lines out to the fans let-
 ting them know I feel their pain,
 their joy and we the club are lis-
 tening but most of all we're ap-
 preciative of all and any support.
 Before anything, we play football
 for the love of the game! In my
 opinion? All the rest money etc
 comes later. There's no better
 way than to play football in front
 of 2 or 2000 people who've come
 to see you do well, giving them
 a voice whether through pick-
 ing man of match, socialising
 with players after game, joining
 club competitions and via so-
 cial media, has to be the way for-
 ward allowing anyone who gives
 up their time to support us, feel
 more appreciative and want to
 give them something back.

Europa and Lincoln Red Imps getting ready for Pepe Reyes Cup this weekend

Europa FC continued with their preparations as they get ready for Sunday's Pepe Reyes Cup Final against Lincoln Red Imps. In their latest matches they played Iberos FC winning the match. The match has already seen some controversy after requested for it to be rescheduled after consideration over Lincoln's progress in the Europa League.

GFA officials have indicated that there will be no changes to the schedules with the match expected to be played this Sunday at the Victoria Stadium. Prior to the cup final Victoria Stadium will see the semi finals of the women's Friendly tournament played out on Saturday providing a weekend long of football before the domestic league starts in earnest next week.

Lincoln in the meantime are seen as one of the clubs in top form at the moment after having gone throughout the summer training and playing competitively in Europe. Their present form has seen many predicting Lincoln are the most likely team to steam ahead at the start of the season due to their current form.

Women's tournament will see Euro winners playing

Four players from the Spanish U19 side that recently won the Euros against Germany's U19 side are expected to be among the players heading to Gibraltar and La Linea to play in the Women's Friendly tournament that kicks off today. The first match will be played in La Linea between Huelva and Paris. Then at 8pm Everton will play US side Salsa.

Three players from Atletico Madrid joined their clubmates last week after returning from the Euro's with the fourth player joining Real Betis whose group matches are in La Linea.

The Atletico players will be playing in Gibraltar.

The teams playing in the tournament have this summer seen new signings come in as they strengthen their squads for the forthcoming season. With teams having as many as seven new signings (Huelva), the Women's Friendly Tournament should see some high end competition as teams put their players through their paces before the start of their own domestic and international matches. Teams should be looking at ensuring the new signings gel well together providing and added dimension to the tournament.

It would also provide local women's football fans a chance to see at first hand international players who have just come back from winning the Women's Euros.
